

Asbestos Locator™

## THE ASBESTOS SOFTWARE SOLUTION FOR YOUR BUSINESS

### Keep Asbestos Management Simple with Asbestos Locator™

Asbestos Locator™ is a simple Asbestos management tool designed to allow easy retrieval of information and effective practical management of asbestos items.

The Asbestos Locator™ system utilises cloud based technology allowing users with a basic familiarity of the internet to access asbestos register information at any site location.

Asbestos register information is presented in a number of easy to interpret formats including photos, searchable register tables and interactive schematics.

*“There is no need for expensive training, external consultants or reliance on individuals with extensive experience within your organisation!”*

Access the Information you need to manage asbestos items in your properties within 3 simple steps!

# Asbestos Locator™

The Asbestos Locator™ system uses the material and priority scoring method recommended by the HSE and converts asbestos risk information into an easy to understand traffic light status for each asbestos item.

Any user with a basic knowledge of the internet is able to easily navigate the software, which has been designed to enable users access to information regarding asbestos containing materials within any location regardless of the number of sites within a given portfolio in just 3 simple steps.

A multi site organisation may allow individual site managers 'view only' access of an individual building on the Asbestos Locator™ system while enabling estates management the ability to access & view information relating to all sites.

**For more information or a demonstration of how the software works please contact us by calling 0870 7019170 or email [sales@euroenvironmental.co.uk](mailto:sales@euroenvironmental.co.uk)**

## Key Benefits:

- Straight forward Electronic Register
- Easy to use, quick & responsive
