

Euro Environmental provides Asbestos services for Cytec nationwide across the UK

Overview

As Euro Environmental successfully manages 400 sites within DHL's portfolio, the client positively recommends Euro Environmental to other companies. After receiving a referral from DHL, Cytec approached Euro Environmental to request Asbestos solutions, bespoke to their requirements. Cytec (based in the US) needed tailored reports, including a specific level of detail, which would meet American standards. Euro Environmental adhered to strict deadlines and time scales, delivering first rate customer service, whilst working rigorously and meticulously under pressure to produce quality reports.

Client Requirement

As a leading American owned manufacturer of carbon fibre based composites, Cytec maintains numerous sites throughout the UK. The client's focus is on innovation, with the goal of delivering speciality materials and technologies that surpass the customer's expectations. Cytec serves various different segments, including: mining, plastics, aerospace and industrial materials.

Originally, an Asbestos consultancy agency was employed by Cytec to implement management surveys in 2014. Although the client perceived these surveys to be of reasonable standard, Cytec was disappointed with the actual report, as there was not sufficient detail recorded in relation to the various Asbestos materials within the building.

In addition, risk data was being managed and reviewed in line with American standards, so Cytec had very specific needs. In search for another company to manage the Asbestos more efficiently, Cytec was introduced to Euro Environmental via a referral from DHL. The specialist Euro Environmental team listened to Cytec's requirements and worked with the client to develop the perfect solution.

Euro Environmental delivering flexible solutions tailored to the individual needs of organisations

By working closely with Cytec and understanding the specific needs of the client, Euro Environmental developed a format and surveying strategy that would ensure a bespoke survey.

In addition to the unique technical requirements Cytec had specified, the organisation was also under pressure to complete renovation works to a tight deadline, due to a pending merger, so Euro Environmental adapted and scaled up resources to work within this narrow time slot.

Result

Euro Environmental believes in developing attentive, professional relationships to fully understand client requirements, as the company is always keen to continually meet evolving demands.

Legal Compliance

Peace of Mind

Business Continuity

Secure Reputation

Quality Reports

Euro Environmental successfully exceeded the client's expectations, by taking ownership and making the effort to understand the relevant industry, adapting working procedures accordingly. Even in difficult to access areas, Euro Environmental ensured the removal of 100% of Asbestos materials, so that Cytec benefited from lasting peace of mind.
