

Euro Environmental provides nationwide solutions for DHL

Overview

Euro Environmental provides national workplace noise and asbestos management solutions to DHL. As a trusted partner of DHL, Euro Environmental has provided services ranging from conducting on site risk assessments to comprehensive project management of Asbestos removal operations, many of which were conducted under strict time constraints to facilitate the client's ongoing operations.

Client Requirement

DHL is the global leader in the logistics industry, operating delivery and warehousing facilities across 220 countries. With over 325,000 employees working across different distribution centres to provide logistics services, the loud noise levels in some locations proved a cause for concern.

DHL needed to ensure protection for their employees to comply with the Control of Noise at Work Regulations (2005). In addition, DHL needed to establish long term plans for Asbestos management in the UK. It was important to the client that any potential partner would possess sufficient industry knowledge and could deliver tailored reports and high quality service. On this basis, DHL decided to partner with Euro Environmental's dedicated team of experts.

Euro Environmental delivers tailored solutions

Euro Environmental provides noise surveys to all DHL's national facilities, ensuring that the client receives quality service and thoroughly detailed reports with information about how to mitigate certain threats. These reports are sectioned by task, so it is evident how a certain task relates to a specific risk. Managers were able to access key health and safety information quickly and efficiently. Euro Environmental's specialist team constantly endeavours to provide the perfect solutions, tailoring services to individual clients to ensure that packages are fit for purpose. If DHL receives a workplace noise claim, the client can easily locate the required, detailed information to support the investigation.

Result

Euro Environmental also makes the effort to understand the nature of DHL's business, in order to give an honest review of the employees most at risk and the damage likely to occur. When the evidence is obtained, Euro Environmental supports the client in implementing and reviewing a Control Action Plan that is relevant, simple and cost effective.

Secure Reputation

HSE Compliance

Safe Operations

Employee Wellbeing

Peace of Mind

Not only does DHL benefit from compliance and peace of mind, but the client is certain to maintain a healthy, strong workforce, as employees are not harmed or distracted by damaging noise levels.
