

## Euro Environmental provide water hygiene management services to The Church of Jesus Christ Latter Day Saints

### Overview

In order to comply with ACoP L8, The Church of Jesus Christ Latter-Day Saints has instructed Euro Environmental to provide a range of legionella services across their property portfolio, including: risk assessments, remedial works, consultancy and training.

**Legal Compliance**

**Peace of Mind**

**Business Continuity**

**Secure Reputation**

### Client Requirement

The Church of Jesus Christ Latter-Day Saints (The LDS) is a church group with a global reach and a presence across 176 countries, including 331 congregations in the UK. They needed a trusted partner to provide guidance and practical advice to help them manage water hygiene across their portfolio of properties.

Compliance with ACoP L8 is necessary to protect LDS members attending their congregations. The LDS were looking for a partner that could provide high quality reports and on-going support to maintain compliance, however a key requirement was this had to be delivered efficiently and in a cost effective manner, so as to minimise capital expenditure. On this basis, LDS decided to partner with Euro Environmental's dedicated team of experts.

### Result

Euro Environmental provides legionella risk assessments, consultancy and remedial services across the LDS's portfolio of sites ensuring that the client received a quality service and thoroughly detailed reports with information about how to mitigate risk.

The reports we produced detailed our recommendations in all the key areas including management systems, domestic hot/cold water systems and other risk systems, so it's clear exactly what actions needed to be implemented. Our capability to deliver a wide range of legionella management services enabled us to deliver solutions to resolve and manage any recommendations within our reports. With our support The LDS is now fully compliant with ACoP L8.
